

SKYSITE™

The first document management solution for construction

Powered by ARC Document Solutions

SKYSITE is your single source of truth.

Challenge

Project teams use multiple “consumer” software tools to manage complex document workflow processes

Business Impact

- Wasteful redundancies
- Outdated project files
- Lack of consistency
- Continuous training and cross-platform coordination

THE SKYSITE SOLUTION

- Designed specifically for the construction industry and developed by ARC, a company with over 100 years of construction document management and distribution experience
- Unifies your entire team’s document workflow processes
- Mobile capability ensures consistency and greater efficiency

SKYSITE™

Powered by ARC Document Solutions

SKYSITE helps construction document managers speed up project delivery

SKYSITE's construction grade syncing technology guarantees your team is always working on the latest set of documents from any device, from anywhere, at any time.

SKYSITE™

Your Single Source of Truth

- Ensure up-to-date drawings, specs, and construction documents
- Collaboration in real time within geographically dispersed project teams
- Sync between the cloud repository and desktop or tablet 24/7
- One login for multiple projects
- Easily manage historical information along with current data

Search, Share, and Collaborate

- Quickly find the right documents with powerful search tools
- “One-click share” projects, folders, files, bid packages and more
- Share markup of field notes and site project updates
- Multi-purpose document reporting tools give you complete control
- Access your project data from anywhere, at any time, from any device

Go Mobile

- Compatible with iOS® and Android® platforms
- Store files for offline access
- Device space saver for optimizing tablet storage
- Extensive markup capabilities
- Communicate and collaborate from any place at any time
- User-friendly and intuitive interface

Strong Security and IT Friendly

- Use project passwords for when extra security is required
- Real-time project activity tracker delivers complete user analytics
- Supports 100+ file formats
- SAS70 Type II compliant
- ISO 27001 certified
- PCI DSS Level 1 certified
- FISMA certified

More Choices. More Control.

- SKYSITE is a user-managed solution that's flexible and easy to use
- Easy budgeting with a predictable fee structure
- Supports reimbursable billing
- Manage content yourself or outsource to one of ARC's 170+ local offices
- Document versioning and historical information management means complete control
