# Scanning & Archival

**Scanning & Archival:  
Find the info you need in  
seconds, not hours.**

- With the slow and costly processes brought on by paper and decentralized workflows, your team is spending significant time conducting inefficient search just to do their job and that is a huge cost to your organization.
- The SKYSITE Archives mobile platform captures, organizes and centralizes all your paper and digital documents from all departments. This gives you instant access to all your information from any mobile or desktop device.
- Free from paper, free up budget Eliminating paper expenses like printing, processing and storage frees up budget for other organizational investments.
- Reduce cost, increase efficiency The average employee wastes at least an hour a day searching for information they need to get their work done. Reduce that 60 minutes to 60 seconds.
- Knowledge is profit Every piece of information created for your organization is an investment. But, when your documents are in storage or filing cabinets, you are not going to see a return on your investment.

[www.e-arc.in](http://www.e-arc.in)

**Storage**

Free up physical and digital storage and reduce long-term outsourcing costs.

**Compliance**

Ensure your documented records management policies are put into practice.

**Protection & Security**

Protect your company's business information from fire, flood, damage and loss with a security-proof archival system

**Reduce Cost**

An effective information management solution reduces your costs and increases productivity by up to 33 %

**Content Chaos**

The average employee wastes 1-2 hours per day searching for information to perform their job. Eliminate the chaos

**Anytime, Anywhere Access**

Keep your team on the same page with file sync to all devices and rest assured that the information is always up-to-date and available-anytime, anywhere.

**Information Silos**

When information isn't shared, problems arise. Reduce duplication of effort and missed opportunities.

**Knowledge Continuity**

Ensure your intellectual property does not walk out the door and is available to current and future staff.

**What can be archived?**

**Small Format Documents**

Scan all sizes of documents, single and double sided, color, black & white or greyscale, all textures.

**Large Format Documents**

Scan large format plans and drawings upto 48" by any length.

**Digital Archives**

Migrate digital archives from local storage to the cloud.

of businesses have seen ROI on their paper-free projects within 18 months

# 3D - Printing Services

## 3D Printing Services:

We offer top notch 3D services in every 3D technology that caters to every industry in the market at every stage of their business

[www.e-arc.in](http://www.e-arc.in)

## Technologies We Serve

Stereolithography (SLA)

Fused Deposition Modeling (FDM)

Digital Light Process (DLP)

PolyJet

## Technologies We Serve

Selective Laser Sintering (SLS)

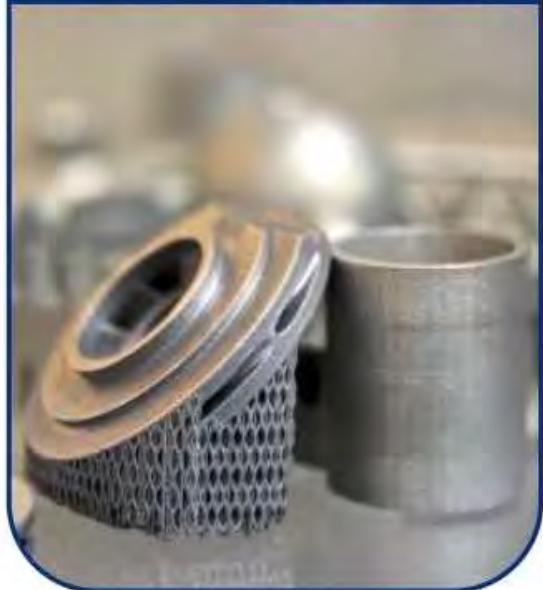

Multi Jet Fusion (MJF)

Color Jet Printing (CJP)

Direct Metal Printing (DMP)

## Technologies We Serve

Vaccum Casting

Injection Molding

3D Designing

Reverse Engineering

## Architectural & Constructions Industry

ARC 3D printing company offers, services for architects and empower them to easily create accurate and durable scaledown models, quickly and cost-effective. Engineering scaledown models of 3D printed architecture can impress customers by giving them a touch & feel visualization of the project this opens up a great opportunity to transform your imaginary sketches / vision into reality

## Aerospace / Defence

3D Printing pave ways for cutting edge transformation & innovation to unleash the talent of dynamic youth to re-engineering their thoughts in many engineering applications and one of the most important industry is aerospace. 3D printing will make space travel/ reasearch more affordable in near future. Our young talented indian minds have recently achieved lots of mile stones from innovative designing to launch of 3D printed spacecraft materials that reached our orbit. thanks to revolution & embracement achieved by usage of 3D printing services & parts in aerospace industry.

3D Printing makes pattern less production a reality in the aerospace industry and some of the applications include the creation of casting for complex gear cases and covers, fuel tanks, transmission housings, Mid air fuel injection units, lightweight engine parts and structural hinges.

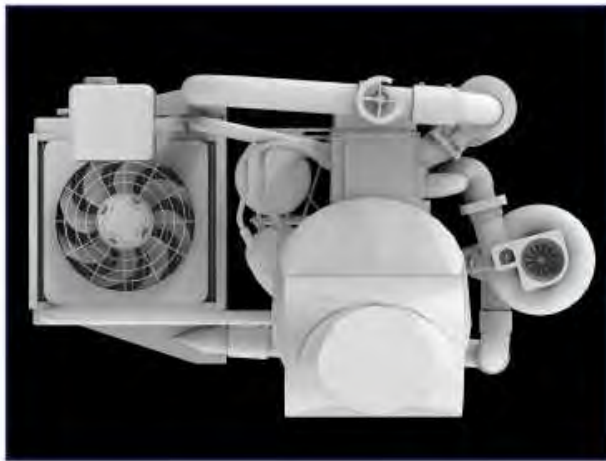

## Medical & Dental Industries

Growing usage of 3D printing in the medical industry has helped the revolutionization of creating tools, prosthesis, dental implants, and so on. It is even used for bio printing, in order to 3D print tissue-like structures. Dental businesses are progressing as the new 3D technologies immensely help Dental Laboratories to develop new working methods to create many devices like 3D printed braces for a faster teeth alignment, orthodontic appliance or 3D printed implants and dental crowns.

## Automotive & Manufacturing

3D printing helps automotive designers to quickly fabricate a prototype of a physical part or assembly, from a simple interior element to a dashboard or even a scaled-down model of an entire car. Rapid prototyping enables companies to turn ideas into convincing proofs of concept. With the use of 3D techniques other than additive manufacturing, parts can be made faster and turn around time for redesigning or remodelling has also come down drastically, this increases the efficiency and does paves way for innovations.

# Trusted by **200k+** Customers

For over 34 years, ARC has been playing a lead role in partnering top names in the industries and deliver them with high quality services to differentiate themselves from competition. With 200k+ customers globally we have been the industry's trusted partner. Our customers have been banking on us to create brand value for their products and services.
